

University of Rajshahi
Dept. Of Computer Science and Engineering
B. Sc. Engineering. 2nd Year 2nd Semester Examination 2025
Course: CSE2252 (Web Application Development Lab)

Set-1

Use Git to clone the following repository into your computer.

https://github.com/m-r-kushal/lab_2252_2025_set1.git

1. In the cloned repository, open the **task1** folder. Edit the **index.html** file and perform the following DOM manipulation using JavaScript:
 - a) Write a click event handler to the "**Change Heading Color**" button to change the text color of the <h1> to **#CC0000**.
 - b) Write a click event handler to the "**Remove Last Item**" button to remove the last from the . If the list is empty, show the text "**No items left**" inside <div id="output">.
 - c) Add a **keyup** event listener to the input field so that as you type, the text inside <div id="output"> shows the number of characters typed, as "**Characters: n**".
2. Build a **Meal Info** React app as described below.
 - a) In the cloned repository, create a new React project named **task2**, install the project dependencies and run the React app.
 - b) Create a component "**src/CategoryPage.jsx**" containing a "**View Meal Categories**" button and show it in the app. When user clicks the button, the app will asynchronously call **API-1** (details below) to fetch all meal categories and display the name and image of each category.
 - c) Add a "**View Food**" button beside each meal category. When user clicks it, call **API-2** to fetch all meals of that category and display their names on the same page.

API Details:

API-1: List of Meal Categories

Call Signature: <https://www.themealdb.com/api/json/v1/1/categories.php>

API-2: Meals By Category

Call Signature: <https://www.themealdb.com/api/json/v1/1/filter.php?c={category}>

Example: <https://www.themealdb.com/api/json/v1/1/filter.php?c=Seafood>

NB: The use of AI tools to auto-generate code during exams is strictly prohibited and considered a punishable offense. If such tools are installed in your code editor, you must disable or remove them. However, you may use online documentation for assistance.
